

What have we been learning in Early Years?

STAR OF THE WEEK

I am star of the week for playing cooperatively and sharing resources with learners in the class.

Well done for showing care and kindness towards everyone. Keep shining!

I am star of the week for showing an open and respectful attitude toward different cultures and family backgrounds.

Keep glowing!

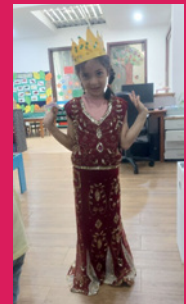

MATHS

Learners have been solving simple addition and subtraction sentences using different manipulatives to help them. Our witches, fairies and princesses can cook up some great recipes!

FANTASY

The learners are loving their new topic at iCAN Play! This Learning Block is all about Fantasy! They helped create the magical castle and are enjoying dressing as witches, wizards, fairies, princesses and princes! For their Entry Point they went on a hunt in the garden.

STORY TIME

Listening to stories helps our learners develop language, attention, and understanding by exposing them to rich vocabulary and ideas in a meaningful way. It also builds connection and empathy.

COMING UP...

Friday 1st May- Learner led conference

OUTDOORS MATHS

The learners love getting outside and playing with nature so when they were asked to identify more or fewer, they were up for the challenge! The learners worked in pairs and worked cooperatively, listening to each other and sharing tasks.

What have we been learning in Early Years?

STAR OF THE WEEK

I am star of the week for being super resilient and working hard on my number problems.

I am star of the week for being super resilient and a great thinker when working and solving number problems. Great work, keep glowing!

Great work, keep shining !

SENSORY PLAY

As learners squeeze, roll, pinch, and shape, they build their fine motor strength. These activities also spark imagination, language, and creativity. At the same time, sensory play like this can be calming and helps learners focus, explore, and feel confident in their learning.

CHILD INITIATED PLAY

There's so much to explore at iCAN PLAY! Learners follow their own interests, make choices, and lead their own learning throughout the day. Carefully designed spaces and a wide range of engaging opportunities invite exploration, creativity, and discovery.

MATHS

Our learners have begun to create addition number sentences. It is wonderful to see them become more confident with counting on!

COMING UP...

Wednesday 6th May: Coffee Morning Transition

LEARNER LED CONFERENCES

Families joined their children today and found out all of the wonderful learning they have been engaging with over the year. Thank you for coming!

What have we been learning in Early Years?

STAR OF THE WEEK

I am star of the week for being a brilliant communicator when reading books this week.

Keep glowing! Ms Anjali

I am star of the week for being a fantastic reader and have been a risk taker when reading more challenging words with the special friend sounds.

Keep shining! Ms Anjali

SWIMMING

The learners had a splashing time during their swimming session this week! They showed growing confidence in the water as they practised putting their faces underwater, kicking their legs, and moving safely through the pool.

PHONICS PLAY

The learners took their phonics out into the garden on Tuesday to practise their single sounds and blending to make CVC words.

IMAGINATIVE PLAY

Open-ended loose parts and construction opportunities allow our learners to be imaginative and creative with their own ideas. Within these worlds the learners are so immersed and are able to practise their problem solving, turn taking, and communication skills. Often they will take on a different role or become a character in their own story.

COMING UP...

Thursday 14th May: King Norodom Sihamoni's Birthday- no school

LETTER FORMATION

Learners practised forming their letters correctly when writing CVC words in the shaving foam. They use ditties to help them remember where each letter starts.
