

What have we been learning in MP1?

★ STAR OF THE WEEK ★

I always show principled behaviour, think carefully about my work, and take pride in making it look wonderful!

I am always a risk-taker and work independently on my learning. *You are a great thinker, and take on advice to improve your learning, especially in literacy. Well done! Ms Lily*

MATHS

Year 2 have been exploring 3D shapes! They have been learning to identify them through faces, edges and vertices. They then had to solve tricky challenges on Seesaw but could use the different shapes to solve the problems.

THE TOYMAKER ENTRY POINT

MP1 had a wonderful morning with their soft toys, exploring many different games and toys for the mysterious toymaker!

EXPLORER TIME

Year 1 learn so many skills through sustained play. Play is essential because it allows children to explore ideas, practise new skills, and make sense of the world around them in a meaningful, joyful way.

Friday 28th November- Learning Reviews issued

CAMBODIAN SOCIAL STUDIES

Year 2 learners have been finding out about animals that live in South East Asia. They learnt that different animals need different habitats to survive.

LITERACY

Year 1 have been using their phonics skills to help them write about their teddy bears.

Our Personal goal for this learning block is Risk Takers. The learners will be encouraged to apply this personal goal in class and at break and lunch times. Whether it is making a new friend, trying a new skill or sharing their ideas in front of the class- it's great to take a risk- give it a go- you never know what you'll discover!

What have we been learning in MP1?

★ STAR OF THE WEEK ★

I am star of the week for being a great thinker in maths and creating a range of repeating patterns using 2D and 3D shapes. I shared my knowledge of shape names as I described each pattern and also spotted rules that applied to how shapes were sorted.

"Well done!" Ms Lily

I am star of the week for showing principled behaviour every day!

"You try your best in every lesson and create wonderful learning" Mr Luke

SWIMMING

Year 1 learners practised swimming on their fronts and backs. They also practised improving their backstroke pull. The learners were great risk takers as they retrieved an object by diving under the water.

LITERACY

Year 2 learners connected with the picture book "Traction Man" by developing their own narrative tales! Using classroom toys and stationery as props, they brought everyday objects to life as heroes. This fun, hands-on activity reinforced core literacy skills by challenging them to create a full story structure, complete with a clear hero, a central problem, and a satisfying resolution.

ART

Year 2 learners have been busy drawing, cutting and stuffing their sea creatures, preparing for a final colour decision. They will choose between warm or cool colours.

MATHS

Year 1 have been exploring a range of hands-on resources to develop their skills in creating repeating patterns with 2D and 3D shapes. We incorporated nature into our learning by collecting natural materials to include in our patterns. Learners applied their knowledge of shape names as they described their patterns.

Our Personal goal for this learning block is Risk Takers. The learners will be encouraged to apply this personal goal in class and at break and lunch times. Whether it is making a new friend, trying a new skill or sharing their ideas in front of the class- it's great to take a risk- give it a go- you never know what you'll discover!
