

What have we been learning in MP2?

★ STAR OF THE WEEK ★

I have been a communicator and risk taker during Knowledge Harvest by exploring new words and for showing resilience in my learning this week.

You have such a positive growth mindset, keep it up! Ms Eva

I have been a resilient learner in maths this week

You have impressed me with your thoughtful questions, independence, and the challenges you set for yourself. Keep up the great work—your positive attitude makes me very proud! Ms Tracy

FEEL THE FORCE ENTRY POINT

MP2 began their new unit with an exciting event - Tug of War! Their new unit is all about the science of forces so they were able to explore pushes, pulls, friction and lots more during this afternoon of fun.

COMING UP...
 Thursday 27th November - Year 3 Celebration of Learning
 Friday 28th November- Learning Reviews issued

LEARNING JOURNEY

Year 3 have been exploring subject specific language for their new unit, *Feel the Force* to show what they already know about pushes, pulls, friction and gravity. They were given different words and had to show their understanding through drawings and diagrams. This was part of our knowledge harvest which we always do before the start of a new unit to find out what the learners already know and want to learn.

LITERACY

MP2 have begun a new book called *Arthur and the Golden Rope*. They have spent some lessons exploring clues in the front cover and the first few illustrations. They also have a mysterious vault that has appeared in their classrooms!

PE

Year 3 have started their new unit 'throwing and catching!' They were practising all different types of throwing overarm, underarm, overhead and chest pass. These risk-taskers did extremely well learning to catch the ball.

RISK TAKERS

Our Personal goal for this learning block is Risk Takers. The learners will be applying this personal goal on the upcoming sleepover where they will be stepping out of their comfort zone by making new friends, trying new things and sleeping away from home.

What have we been learning in MP2?

★ STAR OF THE WEEK ★

I am star of the week for being a wonderful communicator with my new table team by being cooperative, adaptable and hardworking. I've also been a risk taker by joining in to play with different learners in the garden!

"I am so proud of you!" Ms Eva

I am star of the week being an outstanding thinker and enquirer in both Maths and Science this week. I consistently show deep understanding through the clear way I explain my ideas in my book, and my scientific diagrams are detailed and beautifully presented. My commitment to high-quality work truly shines.

"Well done—keep it up!" Ms Tracy

LEARNING JOURNEY

Year 4 have been investigating friction. This week, learners explored how different materials can change the amount of friction on a slippery surface. They carried out an experiment to find out whether sand or salt would increase the friction on ice, making it easier to pick up and move using chopsticks. Learners made predictions, tested their ideas, and discussed how friction helps us in everyday life.

ART

In connection to their literacy, learners in Year 4 are actively linking Cambodian heritage, by looking into and then creating artifacts like ancient hunting tools, expressive masks, practical jars, and traditional paintings.

MUSIC

In Year 3 Music, the learners are mastering the impressive skill of singing while playing an instrument simultaneously! Using colourful Boomwhackers, they worked in groups to play the chords of a popular song, developing their musical timing and vital ensemble skills as true multi-tasking musicians.

MATHS

Year 3 participated in a fun and engaging Multiples of 4 Station Rotation to build a strong foundation in multiplication.

Our Personal goal for this learning block is Risk Takers. The learners will be applying this personal goal on the upcoming sleepover where they will be stepping out of their comfort zone by making new friends, trying new things and sleeping away from home.
